About Me

Software engineer with 2 years of experience with a strong foundation in computer science, and a natural problem-solver.

Projects

CLox

March 2026 — July 2026

Personal Project

Description: Lox interpreter/compiler writtein in C for high performance. Parsing is powered by a custom PratParser. It is a VM based and efficient scripting language.

Stack: C, neovim, emacs, Makefile, GnuMake, Valgrind, Asan, GDB, gf2

Web Server in Assembly

June 2026 — July 2026

Personal Project

Description: A simple web server in x86_64 Assembly with fasm assembly, aims to be minimal and fast with a small binary.

Stack: x86_64 Assembly, fasm, Linux Syscalls

NEWJ

July 2025 — Oct 2025

Personal Project

Description: Simple CLI tool to generate Java project structure. has Gradle dependency presets for different application. currently has: Minecraft, Simple, Spring. Hydrates generated files with templates. sane and configurable defaults.

Stack: Rust, Cargo, clap-rs, proc-macros, Performance Aware Programming

Education

Mashhad, Azad University

2025 - present

B.Sc. in Computer Science

Mashhad, Iran

Technical College

2023 - 2025

Diploma in Multimedia Design

Mashhad, Iran

Technical Expertise

C

Assembly

Rust

GCC/Clang

GDB/Gf2

Systems

Programming

- Manual Memory Management
- Data Structures
- POSIX APIs
- Pointers
- File I/O
- Linux Syscalls

Performance

- Performance Optimization
- Cache-Aware Programming
- SSE
- Benchmarking
- CPU Profiling
- SIMD
- AVX

Debugging

- GDB
- AddressSanitizer
- Profiling
- Valgrind
- Memory Debugging

Build & Tooling

- GCC
- Make
- Linux
- Emacs
- Clang
- CMake
- Neovim
