Mashhad, Iran

Software Engineer with +2 years of experience.

About Me

Software engineer with 2 years of experience with a strong foundation in computer science, and a natural problem-solver.

Projects

Snake Game

July 2024 — July 2024

Personal Project

Description: Classic snake game in java. Software render and minimalist. Uses Custom sprites for apple and the snake. Snake color changes dynamically based on it's size.

Stack: Java, IntelliJ, Unit Test, JUnit, OOP, Design Patterns

Twitter Clone

May 2026 — June 2026

Personal Project

Description: Twitter clone written in Kotlin with spring boot, frontend is powered by NextJS, Tailwindcss and Shadcn.

Stack: Kotlin, Spring Boot, Nextjs, Typstscript, Tailwindcss, REST API

JLox

March 2026 — July 2026

Personal Project

Description: Lox interpreter written in java. Parsing is powered by Recursive-Decent. It leverages Visitor Design Pattern and a custom meta-programming script to generate it's AST.

Stack: Java, Gradle, IntelliJ IDEA, Meta Programming, Design Patterns

Tic Tac Toe

Feb 2024 — Feb 2024

Personal Project

Description: Simple TicTacToe Game. Very basic and early in my programming journey. First project to ever start and finish on my own.

Stack: Java, IntelliJ
